|  |  |  |

The purpose of this program is to enable municipalities to address various types of waterways-related problems and provide for financial and technical assistance during engineering, design, permit acquisition, construction management, construction and related efforts. Typical types of projects qualifying for the program are: dredging of channels, harbors and inland waterways for navigation, tidal flushing, flood storage and river, lake or pond restoration; provision of public access, including rehabilitation of publicly owned piers, seawalls, wharves, jetties, bulkheads and revetments; rehabilitation or construction of flood control measures, including dikes, weirs, check dams, tide or floodgates and flood control internal drainage systems; lake and pond restoration or management activities for public access, water-dependent recreation or habitat enhancement purposes; beach nourishment for barrier beach maintenance, habitat enhancement or recreational purposes; coastal or inland wetlands restoration; and streambank and shoreline erosion control protection.

| Eligibility:    | Municipalities, local or county commissions or local authorities.  Other public or nonprofit organizations or associations can be coapplicants with municipality or county commissions. |                            |

# **Buzzards Bay Watershed Wetlands and Open Space Protection Grants**

The Buzzards Bay Project National Estuary Program offers these grants to assist interested Buzzards Bay watershed municipalities in the protection of open space, rare and endangered species habitat, and freshwater and saltwater wetlands, and to help restore tidally restricted salt marshes, to purchase oil spill containment equipment, to restore fish runs, and to remediate stormwater discharges threatening water quality. These funds have been made available in accordance with US EPA National Estuary Program Cooperative Agreements and are part of an ongoing Buzzards Bay Watershed Municipal Grant Program implemented by the Buzzards Bay Project National Estuary Program.

| Eligibility: | Eligible towns include Fall River, Westport, Dartmouth, New      |

#### Clean Vessel Act Grant Program

The purpose of this program is to build an infrastructure of sanitary pumpout stations for boats with holding tanks in order to improve coastal water quality. Subgrantees can be both in the public sector, such as harbormasters and other municipal officials, and in the private sector, such as marinas, boatyards and yacht clubs.

| Eligibility: | Coastal municipality, private or public marina or yacht club |  |

#### **Recycling, Materials Conservation Toxic Reduction**

#### Municipal Waste Reduction Grant Program

Provides capital equipment, education, and technical assistance grants to municipalities to address recycling, composting, household hazardous waste, vehicle idling, and water conservation. Included in this grant program are:

- 1) Recycling, Composting, Household Hazardous Waste Equipment, Education and Technical Assistance Grants: Grants to municipalities to develop comprehensive recycling infrastructure to properly manage residential solid waste.
- 2) School Chemical Management and Cleanout Grants: Grants to assist with the disposal of unwanted chemicals in schools and improving chemical procurement and storage practices.
- 3) Idling Reduction and Water Conservation Grant Program: Grants to assist communities and schools in establishing idling reduction campaigns including street signs and other promotional materials.
- 4) Pay-As-You-Throw: Grants to assist with the implementation of Pay-As-You-Throw waste management programs in municipalities.

| Eligibility: | Municipalities and r   | regional groups         |
|--------------|--|-------------------------|
| Criteria:    | Various conditions are placed on each grant. Communities must have an ongoing or proposed recycling program and a "buy recycled" program to apply. |                         |
